<u>Please read first before downloading or making any changes to your Guidsign folder.</u>

The zip file includes:
- Guidsign Updates.zip
  - Expanels
  - Shields
  - Reports
  - Styles users
    - 1988
      - ➢ Standard Guidsign Templets
    - 2003
      - ➢ English Templets
  - GuideStore
    - ➢ Metric Templets
- Seed Files.zip
  - GuidSign_English.dgn
  - GuidSign_Metric.dgn
- Signing Standard Highway Signs.zip
  - English Designs
  - Metric Designs
- Support Program.zip
  - English
  - Metric

Follow these steps if you are using GuidSign for NCDOT Signing Projects only.

1. Go to GuidSign folder and "X" out (put a "X" in front of each name, Right Click on folder and Click Rename): expanels, shields, styles, reports, styles users folders.
2. Extract zip files to the GuidSign folder
3. Move GuidSign_English.dgn and GuidSign_Metric.dgn to your \Signing_STDS\Standards\seed folder. This will be your new seed file when starting any new sign design files.

If you do not use GuidSign for only NCDOT Signing Project then don't do step 1 and extract zip files to a separate folder and use these files on NCDOT Signing Project as necessary.

If you have any problems please call Walter Johnson (919) 662-3087.
